

## PRICE PER POT

Our Price Per Pot deal offers you the flexibility to call off the type, length, capacity holder and collet size when needed, giving you the flexibility to grow your collection while lowering tool costs and machine downtime.

## The PPP Range

All pots are made from a NIKKEN back end, collet and pull stud or coolant tube.

The PPP range includes the BT30, BT40 / IT40 (din 69871 SK), BT50 / IT50 (din 69871 SK), HSK63A, HSK100A. The PPP range is also available as both high speed and standard.

Our PPP offer includes the following tool holders: SK Slim Chucks, Multi-lock Milling chucks and our range of face mill arbours and side locks.

NBT which is our solid type taper and face contact system is also available at no extra cost.

All tool holders are through coolant as standard with a cost option for jetter nuts and mechanically sealed collets if required.
